EXPLORE

# Our Expertise is Your Gain

## PRE SETUP CONSULTATION

### STORE SETUP

In this competitive business environment, nothing is less than risky especially for new start ups.

### MERCHANDISING

Merchandising has long been a feature of store promotion activities

### HARDWARE AND SOFTWARE

In Retail 'one size does not fit all'. Business processes are unique to vertical, culture and even region.

## POST SETUP CONSULTATION

### MIS REPORTS AND STATUS

If you don't know your numbers you don't know your business.

### OFFERS AND SCHEMES

Creating offers and schemes is an art to learn. If you don't get one. Create one.

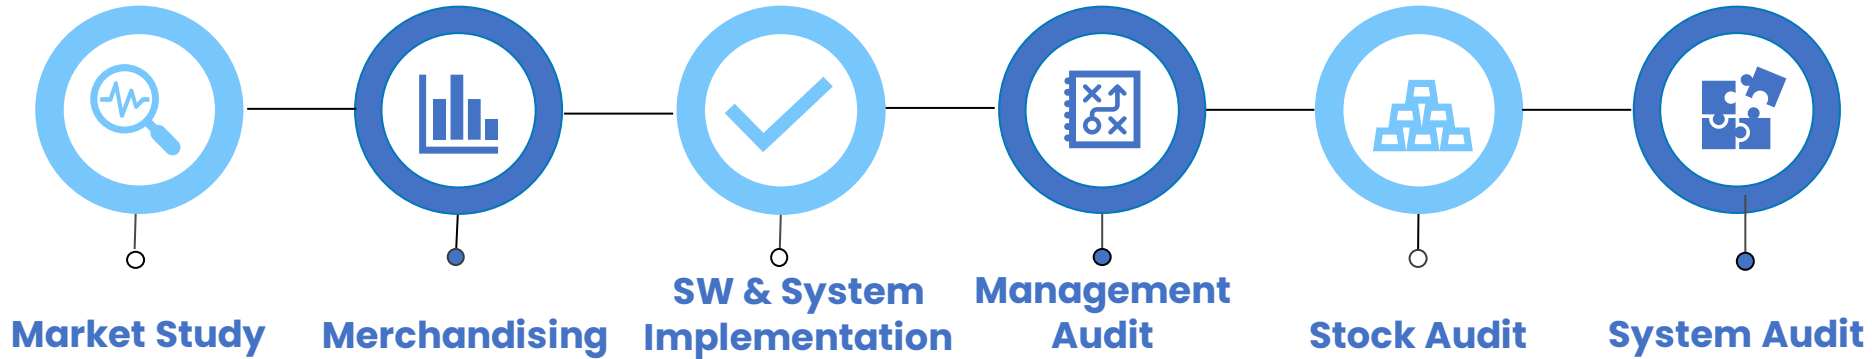

### DISPLAY MANAGEMENT

We decide customers first and last product he is going to purchase.

# Management Audit

---

- A management audit is an independent and systematic analysis and evaluation of a company's overall activities and performances. It is a valuable tool used to determine the efficiency, functions, accomplishments and achievements of the Store.
- A management audit is vast as compared to a financial review because it not only evaluates finance but also other features of a company. It has an efficiency for assessing management from top to lower level.

# Stock Audit

---

- Stock control, otherwise known as inventory control, is used to show how much stock you have at any one time, and how you keep track of it. It applies to every item you use to produce a product or service, from raw materials to finished goods. It covers stock at every stage of the production process, from purchase and delivery to using and re-ordering the stock. Efficient stock control allows you to have the right amount of stock in the right place at the right time. It ensures that capital is not tied up unnecessarily, and protects production if problems arise with the supply chain.

# System Audit

---

- The presence of technology in more and more business areas requires a control, monitoring, and analysis system, such as systems auditing. In the first place, it is necessary to guarantee security when dealing with data, providing them with privacy and good use. Second to make the computer system, a much more efficient and profitable process, allowing detecting errors and making decisions immediately

# Customers Stories

For supermarket business  
you can refer
